In the interactive HTML pack, not in this PDF

The HTML pack is the complete document. These sections are search-, sort- or toggle-driven, or are table sections this chart-first PDF does not carry — they are listed so a reader holding only the PDF knows what is missing and where to find it.

Market structure — size ladder (CRSP total return)

One provider, one methodology across the ladder. Index levels, not investable returns (no fee drag). CRSP's own 'Large Cap' is excluded: it is Mega union Mid, a composite, not a tier. Micro is 1,764 names and 1.2% of market weight.

Tier	Names	1W	1M	3M	YTD	1Y	3Y	5Y	10Y
Mega	173	+1.2%	+1.9%	+6.4%	+14.0%	+18.4%	+92.4%	+92.3%	+353.0%

Market structure – growth vs value by size tier

Market structure is defined at each point in time as the proportion of the market rotation is broad or confined to one end of the ladder - which a single large-cap growth/value pair cannot. CRSP's 'Large' style cut is omitted: it spans Mega union Mid and would double-count against the tiers beside it.

Market structure — dividend contribution

Total return minus price return on the SAME index — a subtraction, not an estimate. 'div' columns are percentage points of the cumulative total return from distributions.

Positions — 3-yr price with 50/200-day MAs and FINRA short interest

Bars below each price line are FINRA consolidated short interest in SHARES, latest settlement 2026-09-15 (17 days ago). FINRA settles twice a month and publishes about eight business days later, so the newest bar sits behind the price line and repeats in consecutive weekly packs. Shares, not % of float: FINRA reports shares only, and dividing three years of history by today's float would restate every past bar. The next settlement (2026-09-30) publishes about 2026-10-12.
