In the interactive HTML pack, not in this PDF

The HTML pack is the complete document. These sections are search-, sort- or toggle-driven, or are table sections this chart-first PDF does not carry — they are listed so a reader holding only the PDF knows what is missing and where to find it.

- Companies in this pack — a click-to-jump index of every ticker; nothing to jump to on paper
- Global equity valuations — EAFE / EM / S&P 500 forward P/E vs their long-run averages
- Market structure — concentration chart — mega vs ex-mega rebased lines; the size/style/dividend TABLES are here
- Weekly sigma moves — this week's outsized moves across coverage
- Large-cap biopharma earnings scorecard — beat/miss vs consensus and perf vs the peer group, 11 names
- Insider activity — Form 4 buying and selling, with the $-held denominator
- Short interest — the screen's table — % of float and the >10% list; the bars here are the FINRA history
- Screening — every screen except double-digit FCF yield — the FCF-yield screen is here; the rest are interactive/sortable
- Views — curated slices — a button-bar toggle over swappable panels
- S&P 500 forward-P/E quintiles + the searchable board — search and live filters do not survive matplotlib
- Analyst coverage — count, weekly & yearly change — left out of the PDF at JP's request, 2026-08-21
- Efficient markets — empirical — table section
- Healthcare trading pairs — ratio table + correlation matrix
- Large-cap healthcare — performance — sortable + searchable; two tables, far past one page in print
- Healthcare Services — every market cap — same, with no market-cap floor
- MedTech — every market cap — same, with no market-cap floor
- Healthcare REITs — every market cap — same, with no market-cap floor

Market overview — trailing total returns

Complete index set, grouped. Equity rows = total return (ETF proxies); Commodities/rates/FX = price/level change, not total return. YTD from prior year-end; 3Y/5Y/10Y cumulative. Blank = insufficient history.

Market structure — size ladder (CRSP total return)

Mega / Mid / Small / Micro by aggregate market level (CRSP total return, no-fee drag). CRSP's own 'Large Cap' is excluded: it is Mega union Mid, a composite, not a tier. Micro is 1,764 names and 1.2% of market weight. LEVELS ARE 36 DAYS OLD — check Coverage Manager's CrspQuarterlySnapshot.

Market structure - growth vs value by size tier

Shows whether growth or value is leading at each market-cap tier. Spread = growth minus value. Tells you whether a rotation is broad or confined to one end of the ladder - which a single large-cap growth/value pair cannot. CRSP's 'Large' style cut is omitted: it spans Mega union Mid and would double-count against the tiers beside it. LEVELS ARE 36 DAYS OLD — check Coverage Manager's CrspQuarterlySnapshot.

Market structure — dividend contribution

Total return minus price return on the SAME index — a subtraction, not an estimate. 'div' columns are percentage points of the cumulative total return from distributions. LEVELS ARE 36 DAYS OLD — check Coverage Manager's CrspQuarterlySnapshot.

Positions — 3-yr price with 50/200-day MAs and FINRA short interest

Bars below each price line are FINRA consolidated short interest in SHARES, latest settlement 2026-10-15 (15 days ago). FINRA settles twice a month and publishes about eight business days later, so the newest bar sits behind the price line and repeats in consecutive weekly packs. Shares, not % of float: FINRA reports shares only, and dividing three years of history by today's float would restate every past bar. The next settlement (2026-10-30) publishes about 2026-11-11.
