In the interactive HTML pack, not in this PDF

The HTML pack is the complete document. These sections are search-, sort- or toggle-driven, or are table sections this chart-first PDF does not carry — they are listed so a reader holding only the PDF knows what is missing and where to find it.

· Companies in this pack	a click-to-jump index of every ticker; nothing to jump to on paper
· Global equity valuations	EAFE / EM / S&P 500 forward P/E vs their long-run averages
· Market structure — concentration chart	mega vs ex-mega rebased lines; the size/style/dividend TABLES are here
· Weekly sigma moves	this week's outsized moves across coverage
· Large-cap biopharma earnings scorecard	beat/miss vs consensus and perf vs the peer group, 11 names
· Insider activity	Form 4 buying and selling, with the \$-held denominator
· Short interest — the screen's table	% of float and the >10% list; the bars here are the FINRA history
· Screening — every screen except double-digit FCF yield	the FCF-yield screen is here; the rest are interactive/sortable
· Views — curated slices	a button-bar toggle over swappable panels
· S&P 500 forward-P/E quintiles + the searchable board	search and live filters do not survive matplotlib
· Analyst coverage — count, weekly & yearly change	left out of the PDF at JP's request, 2026-08-21
· Efficient markets — empirical	table section
· Healthcare trading pairs	ratio table + correlation matrix
· Large-cap healthcare — performance	sortable + searchable; two tables, far past one page in print
· Healthcare Services — every market cap	same, with no market-cap floor
· MedTech — every market cap	same, with no market-cap floor
· Healthcare REITs — every market cap	same, with no market-cap floor

Market overview — trailing total returns

Complete index set, grouped. Equity rows = total return (ETF proxies); Commodities/rates/FX = price/level change, not total return. YTD from prior year-end; 3Y/5Y/10Y cumulative. Blank = insufficient history.

Market structure — size ladder (CRSP total return)

One provider, one methodology across the ladder. Index levels, not investable returns (no fee drag). CRSP's own 'Large Cap' is excluded: it is Mega union Mid, a composite, not a tier. Micro is 1,764 names and 1.2% of market weight.

Market structure – growth vs value by size tier

Market structure is defined at each point in time as the value of growth vs value of value. Size is defined as a rotation is broad or confined to one end of the ladder - which a single large-cap growth/value pair cannot. CRSP's 'Large' style cut is omitted: it spans Mega union Mid and would double-count against the tiers beside it.

Market structure — dividend contribution

Total return minus price return on the SAME index — a subtraction, not an estimate. 'div' columns are percentage points of the cumulative total return from distributions.

Positions — 3-yr price with 50/200-day MAs and FINRA short interest

Bars below each price line are FINRA consolidated short interest in SHARES, latest settlement 2026-09-15 (10 days ago). FINRA settles twice a month and publishes about eight business days later, so the newest bar sits behind the price line and repeats in consecutive weekly packs. Shares, not % of float: FINRA reports shares only, and dividing three years of history by today's float would restate every past bar. The next settlement (2026-09-30) publishes about 2026-10-12.
