# Market structure — size ladder (CRSP total return)

One provider, one methodology across the ladder. Index levels, not investable returns (no fee drag). CRSP's own 'Large Cap' is excluded: it is Mega union Mid, a composite, not a tier. Micro is 1,764 names and 1.2% of market weight.

| Tier  | Names | 1W    | 1M    | 3M    | YTD    | 1Y     | 3Y     | 5Y     | 10Y     |

**Market structure – growth vs value by size tier**

Market structure is different at each point on the value-price pyramid. Size charts a rotation is broad or confined to one end of the ladder - which a single large-cap growth/value pair cannot. CRSP's 'Large' style cut is omitted: it spans Mega union Mid and would double-count against the tiers beside it.

# Positions — 3-yr price with 50/200-day MAs and FINRA short interest

Bars below each price line are FINRA consolidated short interest in SHARES, latest settlement 2026-08-14 (21 days ago). FINRA settles twice a month and publishes about eight business days later, so the newest bar sits behind the price line and repeats in consecutive weekly packs. Shares, not % of float: FINRA reports shares only, and dividing three years of history by today's float would restate every past bar. The next settlement (2026-08-31) publishes about 2026-09-10.
